# SIGRAFLEX® HOCHDRUCK PRO

TA Luft-compliant multilayer high-strength sealing sheet made from natural graphite with stainless steel foil reinforcement for extreme conditions

SIGRAFLEX HOCHDRUCK *PRO* is a multilayer high-strength graphite sealing sheet comprising thin layers of high-purity graphite foil and 0.05 mm thick stainless steel foils. Depending on the sheet thickness required, several layers of graphite and stainless steel foil are joined together in a special adhesive-free process. As a result, the sheets have outstanding mechanical properties. The sealing sheet is impregnated to reduce leakage and improve handling.

SIGRAFLEX HOCHDRUCK *PRO* allows end users in the process industry to cover almost their entire gasket requirements with a reliable and safe product.

↑ Cross-section

#### **Applications**

- For difficult and mechanically highly stressed sealed joints (in tongue-and-groove and flanges with special dimensions, process equipment, heat exchangers, etc.); also suitable for all common pipework and vessel flange designs
- For one-piece gasket designs up to an outside diameter of 1500 mm; for diameters above 1500 mm, for example two-layer structures with segmented sections and staggered joints are recommended
- For operating pressures from vacuum up to 250 bar
- For corrosive media
- Operating temperatures range from –250 °C up to 450 °C depending on chemical resistance, and possibly to 550 °C after consulting the manufacturer. Life time might be limited by actual equipment temperatures and operating conditions. Please refer to our technical guidelines regarding thermal stability.
- Chemical, petrochemical, refinery and nuclear industries
- Steam pipework and boilers in power generation plants
- Heat transfer oils and heating equipment
- Inspection glasses, pumps, fittings and valves
- Existing plants

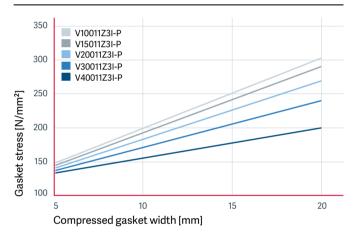

#### **Properties**

- Reduction in fugitive emissions due to high leak-tightness
- Complies with the TA Luft leakage requirements for all sheet thicknesses
- Outstanding maximum permissible gasket stress
- High operational reliability, increased plant availability
- Excellent oxidation resistance
- Very high blow-out resistance and mechanical strength
- Very high fault tolerance during assembly and operation
- Good chemical resistance
- Long-term stability of compressibility and recovery, even under fluctuating temperatures

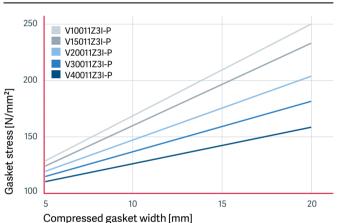

- Good scratch resistance and antistick properties due to special impregnation
- No measurable cold or warm flow characteristics up to the maximum permissible gasket stress
- No aging or embrittlement (no adhesives or binders)
- Ease of processing
- Asbestos-free (no associated health risks)

The properties of this product have been improved. The old data sheet is valid for material produced prior to the transition phase.

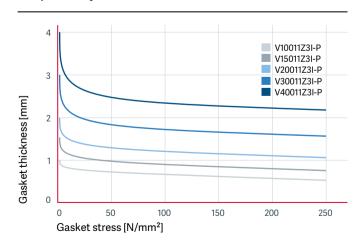

# Typical maximum permissible gasket stress of SIGRAFLEX HOCHDRUCK PRO at 20 °C

# Typical maximum permissible gasket stress of SIGRAFLEX HOCHDRUCK PRO at 300°C

### Compressibility of SIGRAFLEX HOCHDRUCK PRO

### Approvals/Test reports

- TA Luft (VDI 2440/VDI 2200) for all thicknesses
- Fire safe according to API 607
- Blow-out resistance (TÜV Süd at 2.5 times the normal pressure)
- Hot Blow-Out (HOBT, ASTM WK18046)
- BAM oxygen
- DVGW (DIN 3535-6)

### Assembly instructions

Our detailed assembly instructions are available on request.

#### Material data of SIGRAFLEX® HOCHDRUCK PRO

Maximum permissible gasket stress in service

"m"-factor Similar to m, but defined acc. to ASTM, hence different value

 $\sigma_{\text{BO at 300 °C}}$ 

m\sigma\_{BU}/p\_i

"y"-factor Minimum gasket stress in psi

#### **Product overview**

Products	Characteristics	Recommended applications		
SIGRAFLEX FOIL F/C/E/Z/APX/APX2	Flexible, continuous	–250 °C to approx. 550 °C, for die-formed packing rings, spiral-wound and kammprofile gaskets		
SIGRAFLEX STANDARD LCI	Unreinforced, impregnated	Raised-face flanges, enamel or glass flanges, highly corrosive media		
SIGRAFLEX ECONOMY VC4	Reinforced with bonded stainless steel foil	Pumps, fittings, gas supply and waste gas pipelines		
SIGRAFLEX UNIVERSAL VC2I	Reinforced with tanged stainless steel, impregnated	Pipework and vessels in the chemical and petrochemical industries and in power generation plants		
SIGRAFLEX UNIVERSAL PRO VC2I-P	Reinforced with tanged stainless steel, impregnated	TA Luft applications, for pipework and vessels in the chemical and petrochemical industries and in power generation plants		
SIGRAFLEX SELECT V16010C3I	Reinforced with stainless steel foil, adhesive-free, impregnated	TA Luft applications, raised-face flanges, pipework in the chemical and petrochemical industries		
SIGRAFLEX HOCHDRUCK VZ3I	Multilayer material, reinforced with stainless steel foil, adhesive-free, impregnated	Universal sealing sheet, also for solving sealing problems in pipework, process equipment, tongue-and-groove flanges and non-standard joints in the chemical, petrochemical and nuclear industries and in power generation plants		
SIGRAFLEX HOCHDRUCK PRO VZ3I-P	Multilayer material, reinforced with stainless steel foil, adhesive-free, impregnated	Universal sealing sheet for TA Luft applications, also for solving sealing problems in pipework, process equipment, tongue-and-groove flanges and non-standard joints in the chemical, petrochemical and nuclear industries and in power generation plants		
SIGRAFLEX APX2 HOCHDRUCK VW3	Multilayer material, reinforced with stainless steel foil, adhesive-free	Universal sealing sheet, also for solving sealing problems in high temperature applications in pipework, process equipment, tongue-and-groove flanges and non-standard joints in the chemical and petrochemical industries and in power generation plants		
SIGRAFLEX MF VMF	Adhesive-free laminate made of graphite, stainless steel and PTFE	Maximum requirements for sealability (TA Luft), safety and process hygiene; sealed joints in the chemical, petrochemical, pharmaceutical and food industries		
SIGRAFLEX EMAIL VZ3E	Reinforced with stainless steel foil, adhesive-free	PTFE-envelope gaskets for enameled pipework, vessels and stub connections, etc.
